Super Light Weight ,
and Sized Just Right.

Now anyone can say,

"FISH ON!!!"

The 152 Westcoaster is a true low cost, light weight, and carefully crafted welded fishing machine. Priced to easily take home, you will notice six gallons of fuel will get you far and fast. Towing won't break the bank, you can pull this boat with 4 cylinders. Take a gander at the expensive premium welded boats, you will notice that our welders are able to "Stack Dimes" with the best of them. Not only on the outside finish welds, but on the inside welds, under the floorboards, too!

This is the perfect lake boat that will get you anywhere on the water in a snap. No more standing on the bank or paddling around, get to your spot dry and comfortable. Move from this hole to that hole because now you can. There isn't a hump, rock pile, clam bed, bait ball, or submerged timber you cant get to. Stick that bait right on their nose and hold on tight!
